PROFILE

SDET with 5+ years designing, building, and maintaining automated E2E and API test suites in TypeScript and Python across fintech, media, and automotive platforms. Owns quality gates end to end: shift-left test strategy, Playwright/Pytest automation, Docker-containerized environments, and staged CI/CD pipelines in GitHub Actions, GitLab CI, and Jenkins. Hands-on with AWS and observability (Grafana, CloudWatch), and building practical AI-assisted testing skills through public LLM-driven test-generation projects.

TECHNICAL SKILLS

Test Management: TestRails, BrowserStack Test Management, Lambda Test, MS Excel, Test Planning, TDD, BDD, Shift-left testing, Regression Testing, Smoke Testing, Exploratory testing, Defect management.

Test Automation: Playwright (TypeScript/JavaScript), Cypress, Appium, Pytest, Selenium, Postman/Newman, REST API testing

Project Management: JIRA, Confluence, Agile (Scrum/Kanban), X-RAY, GitLab

Languages & Scripting: TypeScript, JavaScript, Python, JAVA, Bash/Shell, SQL

AI-Assisted Testing: Prompt engineering, AI-generated test cases, Playwright MCP, Playwright CLI, Claude Code, Cursor, GitHub Co-Pilot

CI/CD & DevOps: GitHub Actions, CI/CD, Jenkins, Azure DevOps, Docker.

Cloud & IaC: AWS (EC2, S3, IAM, CloudWatch), Terraform and Kubernetes (foundational)

Monitoring & Observability: Grafana, AWS CloudWatch, Flaky-test analysis, DeepEval, Langfuse, LLM tracing, evaluation datasets, quality metrics, latency/token monitoring, AI failure analysis

WORK EXPERIENCE

QA Engineer (SDET) · DYN Media GmbH, Cologne

Jul 2024 – Present

- Design, build, and maintain automated E2E (Playwright/TypeScript) and API test suites, enforced quality gates in CI/CD pipelines (GitHub Actions) on every pull request and merge.
- Integrated Playwright CLI with AI coding tools (Claude, Cursor) to automate test generation and DOM inspection, cutting script creation time by 35%.
- Implemented Playwright MCP server in sandboxed test environments to enable dynamic, prompt-driven UI validation and automated exploratory testing.
- Visualized, captured, and diagnosed UI glitches by taking automated screenshots, recording session logs, and checking network traffic during test runs.

System Test Engineer · Joynext GmbH, Dresden

Sep 2023 – Feb 2024

- Executed system and integration tests for automotive infotainment firmware on hardware benches and simulators against OEM specifications, catching critical defects before OEM sign-off.
- Maintained full requirements traceability matrices so every infotainment module had documented coverage.
- Coordinated defect correction with OEM stakeholders and development teams within an agile release cycle.
- Performed exploratory testing of new features and complex edge cases; documented defects with reproduction steps and coordinated fixes with developers and product owners.

Test Automation Engineer · Finoa GmbH, Berlin

Nov 2022 – Aug 2023

- Built and maintained CI/CD-integrated end-to-end and REST API test automation with parallel execution for a regulated crypto-asset platform, raising QA throughput and cutting flaky failures.
- Integrated automated API tests into CI pipelines to detect integration and regression problems early in the development lifecycle.
- Kept the automation codebase maintainable through modular design and code review across TypeScript and Python.
- Participated in code reviews and improved test-code maintainability and reusability.

Software Tester · Scoolio GmbH, Dresden

Jan 2020 – Sep 2022

- Owned QA for Android and iOS apps used by 100k+ students; defined test strategy, test plans, and defect workflows.
- Defined test strategies, test plans, regression coverage, and defect workflows.
- Built the Appium mobile automation test suite from scratch, cutting manual regression effort by 40%.
- Collaborated with developers and product teams to improve testability and release quality.

Associate System Engineer · TPS Worldwide, Karachi

Feb 2017 – Oct 2018

- Supported banks on e-banking and payment-processing incidents, traced transactions across ATM, POS, and internet-banking channels to root cause.
- Queried MySQL and Oracle 10g/11g databases using SQL to investigate production incidents.
- Coordinated technical investigations involving transaction-processing and banking systems.

AI-ASSISTED TESTING PROJECTS (GITHUB)

AI QA Automation Framework — LLM & RAG Quality Evaluation

Python | Playwright | Pytest | DeepEval | Langfuse | GitHub Actions

- Built a Playwright + Pytest framework that tests an LLM customer-support assistant through the browser, then layers AI evaluation (DeepEval, RAGAS, Promptfoo) on top to score response relevancy, faithfulness, and retrieval quality.
- Wired a CI/CD quality gate into GitHub Actions that blocks a merge when evaluation scores drop below threshold.

Playwright Test Agent — Web & API Suite with Staged CI

Python | Playwright | Pytest | LLM APIs | GitHub Actions

- Built an AI-assisted test automation workflow combining LLM-based scenario classification with executable Playwright web and API tests.
- Used LLM assistance to translate testing scenarios into structured automation workflows while retaining deterministic executable validation.
- Designed a staged GitHub Actions pipeline: API → UI smoke → UI full → cross-browser matrix.

Playwright Agents — Autonomous E2E Testing

TypeScript | Playwright | POM | AI Agents

- Planner/generator/healer agent workflow: agents explore the app, generate executable E2E tests from a Markdown plan, and repair failing tests on a POM fixture architecture.

EDUCATION

M.Sc. coursework, Applied Mathematics — Network & Data Sciences

Hochschule Mittweida, Germany (90 ECTS completed) · 2018–2024

B.Sc. Computer Science

Sir Syed University of Engineering & Technology, Karachi, Pakistan · 2012–2016

CERTIFICATIONS & TRAINING

- DevOps on AWS: Tools for Automated Workflows (LinkedIn Learning)
- Intermediate Jenkins: Automate, Integrate, and Secure CI/CD Workflows at Scale (LinkedIn Learning)
- Playwright Advanced Automation (Udemy)

LANGUAGES

English: Fluent (full working proficiency) German: A2 (actively pursuing B1)
